John F. Kennedy said, "The great enemy of the truth is very often not the lie: deliberate, continued, and dishonest; but the myth: persistent, persuasive, and unrealistic." This is the battle we face when it comes to the U.S. health care system: a set of myths so persistent, persuasive, and unrealistic that it's easy to see why so many Americans believe that a complete government takeover of our health care system is the answer to all of our problems. Sally Pipes's new book, *The Top 10 Myths of American Health Care* will shatter those myths and set the record straight.
